DETAILED ACTION

Response to Arguments

1. The Applicant correctly asserts that claim 14 in the previous Office Action mailed 11/1/07 was mistakenly not addressed and therefore the finality of that Office Action was improper.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the term "computer-readable recording medium" is not mentioned at all in the specification. A definition of the term is needed in order to ensure that the medium is not directed to non-statutory subject matter, such as a signal.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
4. Claims 7-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed toward software per se. The Applicant defines an embodiment of the invention in which the automatic programming device is software (see pg. 57, lines 15-30 of the Specification). Software per se is non-statutory subject matter.

Allowable Subject Matter

5. Claims 10-14 are allowed.
6. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose automatically determining by an automatic programming device a type of machining device controlled by a numeric controller, wherein the type of machining device comprises one of: a two-spindle machine having a first main spindle and a sub-spindle and a one-spindle machine having a second main spindle. The allowability, at least in part, resides in this fact.
